DRL025 Supply Chain Performance Measurement

PhD Course 14 - 18 September 2020, Molde, Norway

Objectives

The overall aim of the course is to develop student's competencies in researching, analyzing and managing performance in supply chains. Performance management is concerned with how managers in the supply chains use different types of management accounting technologies to make strategic oriented design decisions and control their supply chains.

Topics

- What is performance management in supply chains?
- Why measure supply chain performance?
- What to measure in supply chain management?
- Concepts for measuring supply chain performance
- Applying the balanced scorecard to the measurement of supply chain performance
- Metrics and key performance indicators for supply chain performance
- Criteria for KPI selection, which indicators to use
- Organization of the performance management system.

Case studies

- Logistics
- Transportation
- Shipping

Please notice:

The course will be offered as an online course due to Corona-restrictions.
